

presents

Event Studios Australia's 2011/2012 Festival Season has kicked off at the Flemington Spring Racing Carnival with a new modified Yellowglen Structure as well as the Myer Fashions on the Field Structure.

We are also proud to unveil eATMi. In function, eATMi is a information station, an ATM point and an evolving unit in one contained module.

It is a dominant and highly visible system, suitable for any arena. eATMi delivers the most eye-catching, innovative and cost effective event marketing tool for sponsors who want to reinforce or extend a message using prominent on-site advertising.

We designed a new look 3AW Box for the Royal Melbourne Show...

And we've just finished the Broadcast Centre for Seven Network at the Australian Open.

Check out the first 3 months of clients for eATMi!
